TO: Examiner Quana M. GRAINGER Group Art Unit: 2852
FROM: Lee Stephina
DATE: June 14, 2005
RE: 232170US26 (Serial No. Serial No: 10/715,360)

In accordance with our telephone conversation of June 7, 2005, we are returning the enclosed Supplemental Notice of Allowance which inadvertently included two pages of Examiner's Amendments that are apparently directed to another client regarding another case.

We acknowledge receipt of your *revised* Supplemental Notice of Allowance (re: Claims 1-31) faxed to us on June 7, 2005 which *replaces* the above-identified document herewith returned to you.

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☐ This communication is responsive to _____.
2. ☒ The allowed claim(s) is/are 1-30.
3. ☐ The drawings filed on _____ are accepted by the Examiner.
4. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☐ All b) ☐ Some* c) ☐ None of the:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

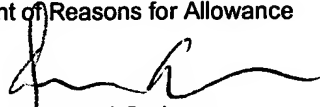

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
6. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
 - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
7. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☐ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3. ☒ Information Disclosure Statements (PTO-1449 or PTO/SB/08),
Paper No./Mail Date 7-22-2004
4. ☐ Examiner's Comment Regarding Requirement for Deposit
of Biological Material
5. ☐ Notice of Informal Patent Application (PTO-152)
6. ☐ Interview Summary (PTO-413),
Paper No./Mail Date _____.
7. ☐ Examiner's Amendment/Comment
8. ☐ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____.

Docket ALBR:0094-1

Changes for Examiner's Amendment

1. (currently amended) A system for providing data and power signals from a network to a device, the system comprising:

a connector body having first and second sides;

an orientation-sensitive, multi-conductor plug on the first side, the plug being configured to be inserted into a mating receptacle ~~for transmitting~~ that transmits data and power from a network;

a pair of orientation sensitive, multi-conductor receptacles on the second side, each receptacle being configured to receive a mating plug of independently and removably matable device cables ~~for transmitting~~ that transmit data and power from the network to a ~~of~~ downstream device without interruption of data and power to a device coupled to the other receptacle; and

a plurality of conductive elements disposed within the body to define at least four separate conductive paths between the plug and the receptacles, including two data paths and two power paths.

10. (currently amended) A system for providing data and power signals from a network to a device, the system comprising:

an orientation-sensitive network receptacle ~~for transmitting~~ that transmits data and power from the network;

a connector matable with the receptacle, the connector including a connector body having first and second sides, an orientation-sensitive, multi-conductor plug on the first side, the plug being configured to be inserted into the network receptacle ~~for transmitting~~ that transmits data and power from the network, a pair of orientation sensitive, multi-conductor connector receptacles on the second side, the receptacles being configured to receive mating plugs ~~for transmitting~~ that transmit data and power from the network to a pair of downstream devices without interruption of data and power to either device, and a plurality of conductive elements disposed within the body to define at least four separate

conductive paths between the plug and the receptacles, including two data paths and two power paths; and

cable assemblies including plugs independently and removably matable with the connector receptacles ~~for transmitting that transmit data and/or~~ and power from the network to the pair of downstream devices.

31. (currently amended) A system for providing data and power signals from a network to a device, the system comprising:

a connector body having first and second sides;

an orientation-sensitive, multi-conductor plug on the first side, the plug being configured to be inserted into a mating receptacle ~~for transmitting that transmits~~ data and power from a network;

a pair of orientation sensitive, multi-conductor receptacles on the second side, each receptacle being configured to receive a mating plug of independently and removably matable device cables ~~for transmitting that transmit~~ data and power from the network to a downstream device without interruption of data and power to a device coupled to the other receptacle, the receptacles being configured to receive plugs identical to the plug of the connector; and

a plurality of conductive elements disposed within the body to define at least four separate conductive paths between the plug and the receptacles, including two data paths and two power paths.

wherein the receptacles are configured to receive plugs identical to the plug of the connector.
